HPI ALARM.COM
Management MULTI-LOCATION

Manage all your properties from one dashboard, including real-time status of doors, alarm states, live video, and more.

USER MANAGEMENT
Easily create or revoke alarm user codes and card access permissions across multiple locations.
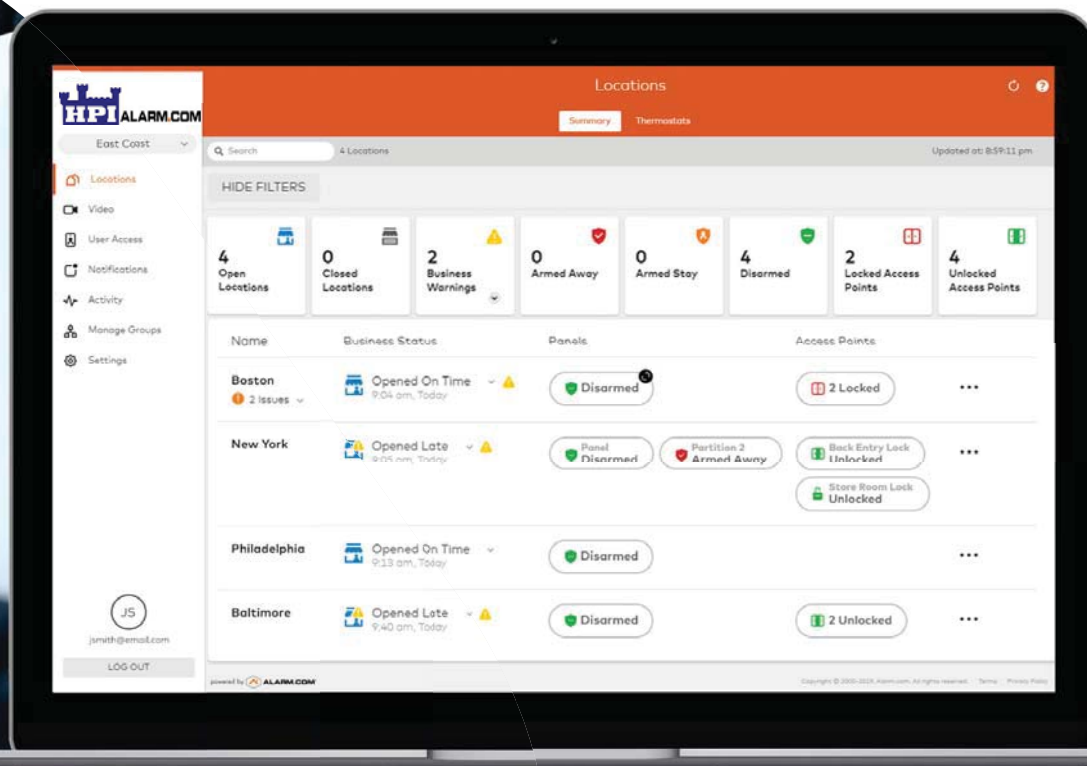

LOCATION HIERARCHY
Organize locations into logical groups, such as by region or manager, and easily move locations between groups to accommodate business growth.

UNIFIED SETTINGS
Apply the same settings for business hours, notifications, and more across a group of locations.

MULTI-LOCATION REPORTS
Automatically receive scheduled multi-location activity reports to get actionable insight across all your properties.

Intrusion Protection

Reliable security and automation ensure your business, employees, and inventory stay protected.

EASILY MANAGE USER CODES
Add or remove user codes, assign access by partition and create auto-expiring codes, all from one interface.

AUTO-ARMING
Never risk forgetting to arm the system by enabling auto-arming at a set time, or after a pre-determined period of sensor inactivity.

SYSTEM EVENT HISTORY
Access up to 365 days of complete event history for internal record-keeping and auditing.

REPORTS
Use scheduled reports to quickly understand operational trends, such as arming/disarming, sensor activity, door access, and more.

ACTIVITY NOTIFICATIONS
Receive instant notification of critical issues such as a possible intrusion, power outage, late open, early close, or off-hour disarm.
