

Micro Mobile Device

A true all-in-one wearable, the new Micro offers the best-in-class features and benefits that consumers want, including the ability to live without limitations. This device can go where they go: it works at home and away, with state-of-the-art GPS location detection. And its simple operation ensures help is always just a button press away.

With benefits such as an industry-best long battery life of up to 4 days, the new Micro is smaller than all its predecessors and is waterproof for use in places such as the bathroom or at the pool.

Our patented automatic fall detection technology is integrated into the device for ultimate customer safety and will do the heavy lifting in the event of an emergency, automatically detecting a fall and calling for emergency help – even if the customer can't speak.

Best-in-class features:

*Service Availability and Access/Coverage on the AT&T network is not available everywhere and at all times. Current GPS location may not always be available in every situation. GPS technology is a feature of the Mobile Device. Patented technology. Fall Button does not detect 100% of falls. If able, users should always push their help button when they need assistance. Fall Button is not intended to replace a caregiver for users dealing with serious health issues.
