SMARTER
Business Security

ALARM.COM x
My Business: Opened on time at 7:02 am on Tuesday, 7/16.

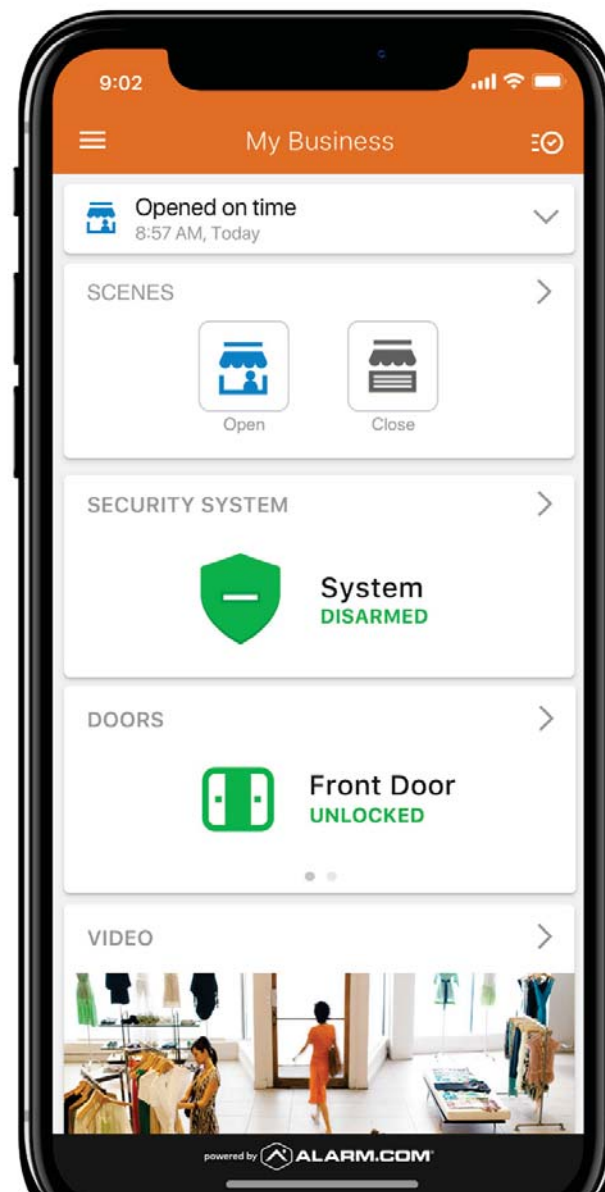

Smarter Business Security

With professionally monitored security, access, energy management and video monitoring solutions, you get peace of mind knowing that your business properties are protected and running smoothly — all from one app.

Alarm.com for Business allows you to:

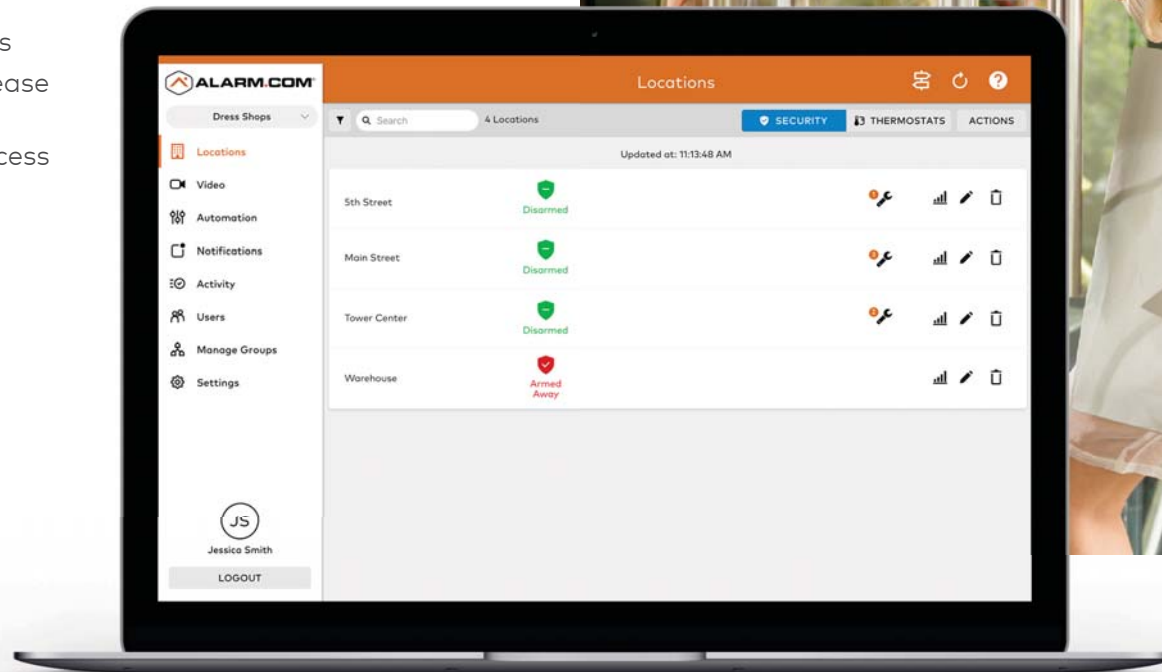

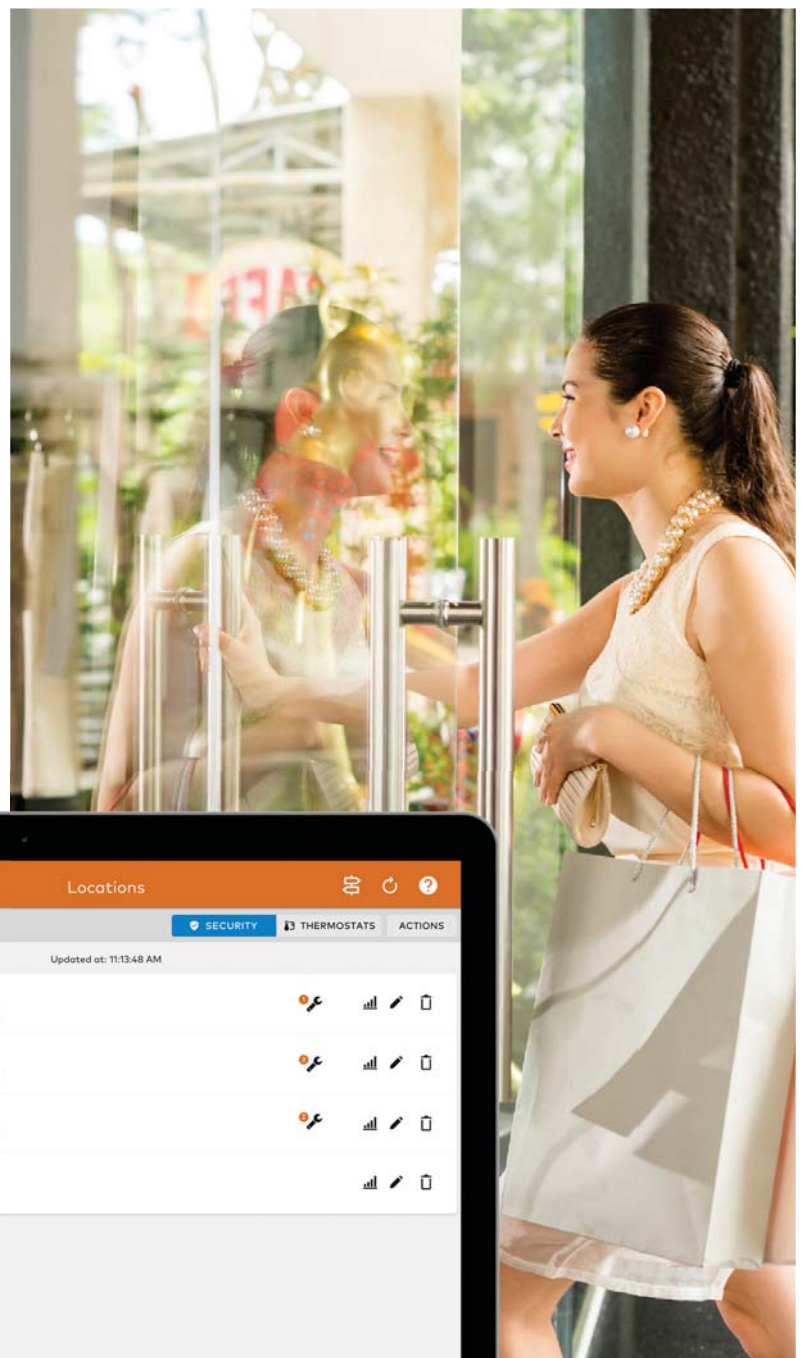

- Stay secure, connected and aware
- Get notified if your business opened late or closed early
- Access reports to gain insights into day-to-day activity
- Receive alarm notifications and video clips to see what occurred
- Keep an eye on inventory and equipment with video surveillance
- Easily add or remove user codes to manage employee access
- Save money by reducing energy use with integrated smart thermostats

Professional Grade Security

Reliable, professional installation and monitoring ensure your business, inventory and equipment are always protected.

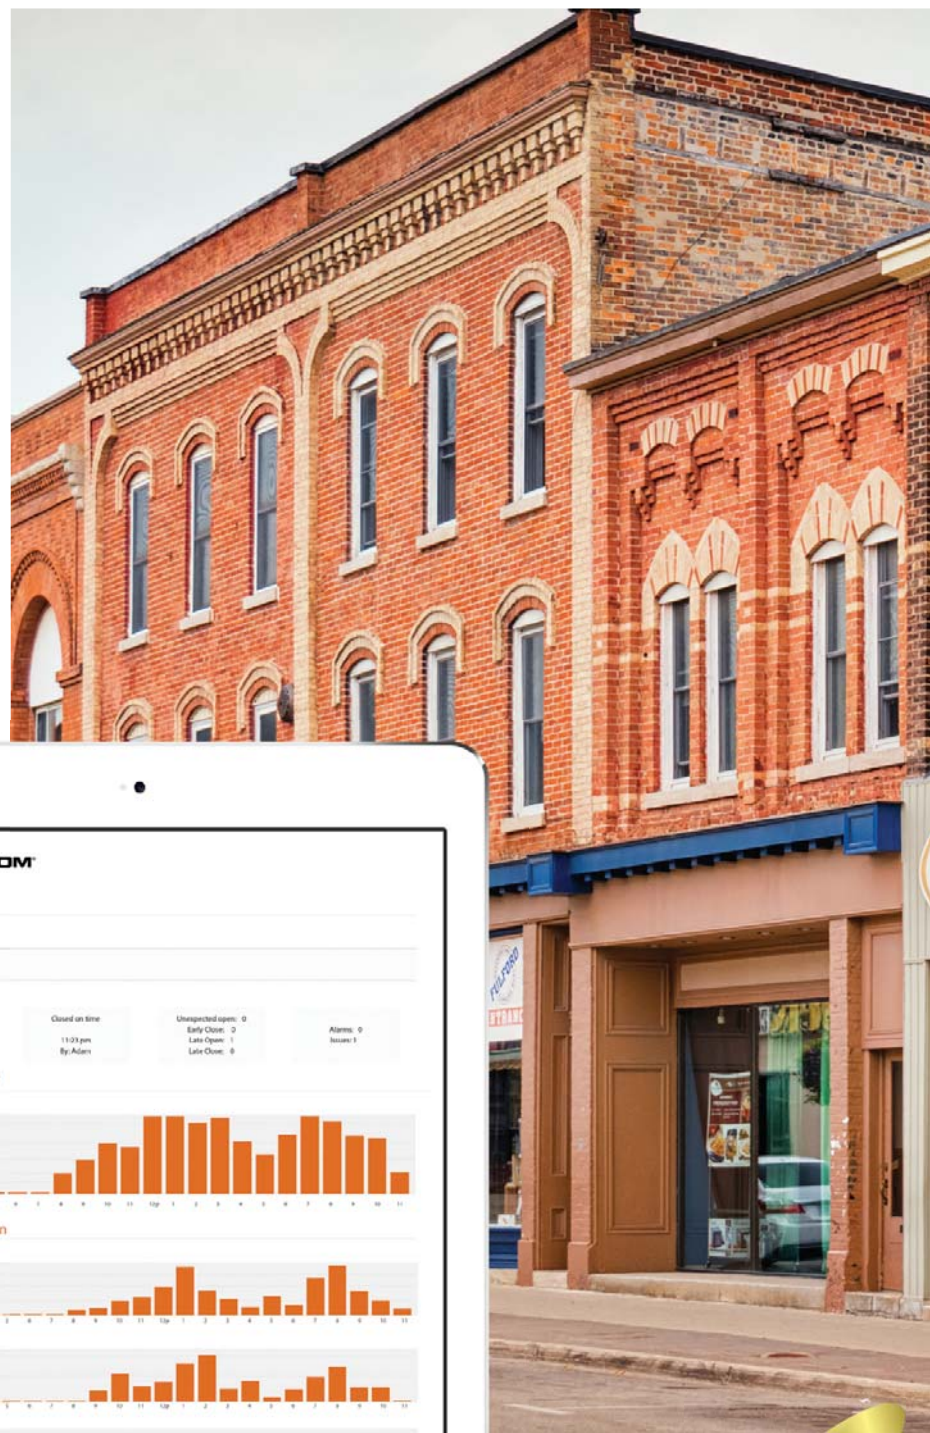

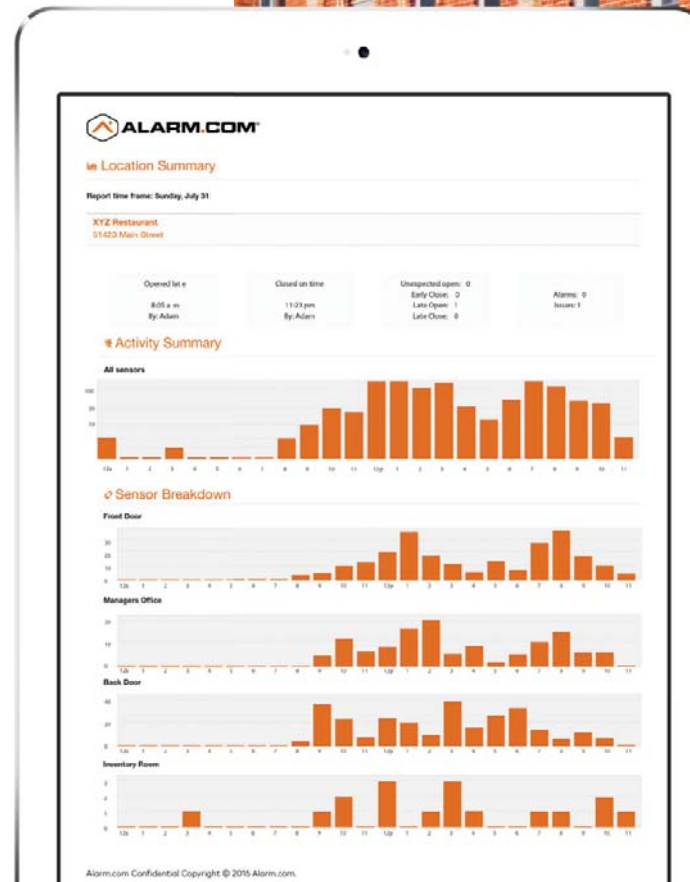

- Use auto-arming to ensure that your system is always armed when it should be
- Remotely cancel false alarms from anywhere
- Manage employee User Codes across multiple locations with ease
- Instantly remove User Code access for terminated employees
- Manage multiple sites from one centralized dashboard

Business Insights

Business insights provide critical information about your organization, across multiple locations, through daily, weekly and monthly reports.

- Get real-time notifications if employees are opening your business late or closing early
- See who armed or disarmed the system and when
- Activity reports analyze sensor activity allowing you to:
 - See visual graphs of your busiest times of day
 - Make informed decisions on staffing needs and business hours
 - Track the impact of promotions on customer traffic
 - Gain awareness and evidence of activity in sensitive or restricted areas
 - Receive notifications if employees are arriving late or leaving early

Video Monitoring

CONSTANT AWARENESS

With single and multi-site viewing, live-streaming, recorded video and real-time notifications, it's easy to see what's happening when you can't be there and more easily manage false alarms.

RELIABLE & SECURE

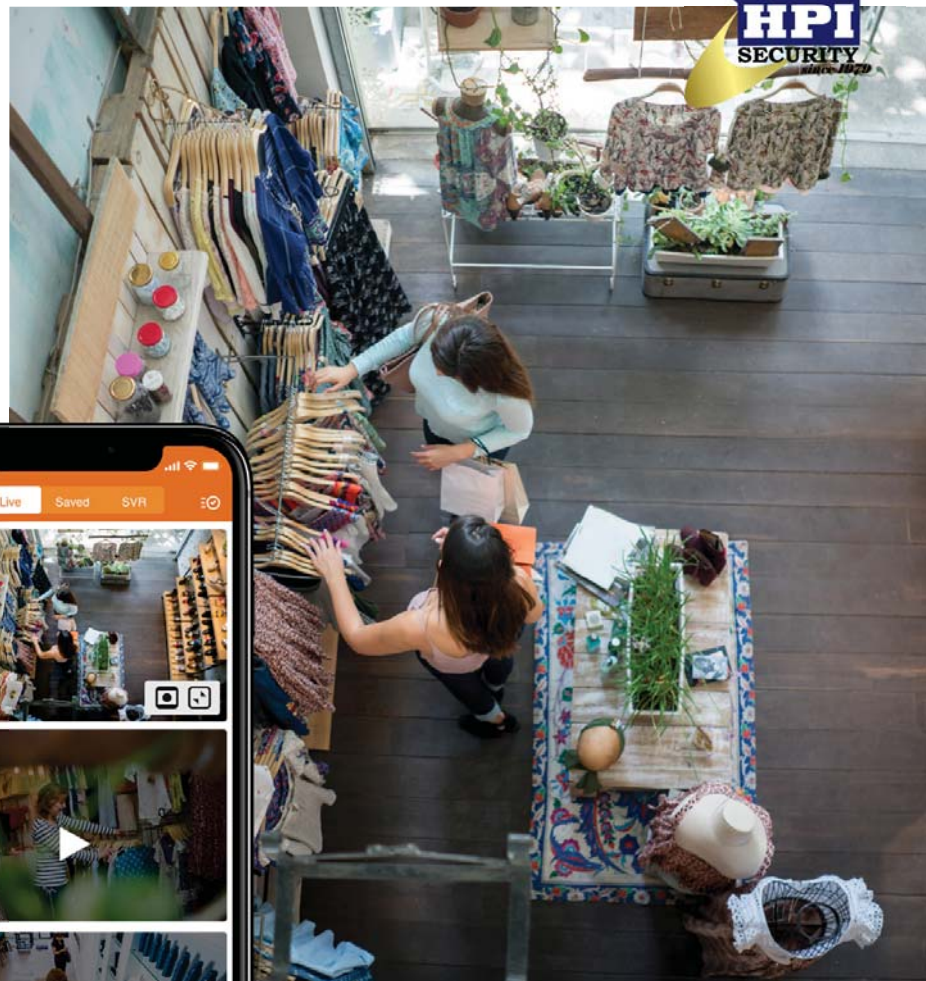

Record video on-site to the Stream Video Recorder and to the cloud at the same time. Cloud storage cannot be disabled or damaged if your business experiences a fire or flood event.

SEE EVERYTHING

Easily find the events that you want to see in your video timeline. Search and filter by what is important to you, such as when the stock room door was opened, motion was detected, or an alarm was triggered.

SMARTER ALERTS

Know when people, animals or vehicles are detected and only capture the clips you want to see. For example, get an alert when the delivery truck arrives, but not when employees are outside.

Managed Access

IMPROVED CONTROL

Get a completely configurable and easy-to-manage access control solution for small and medium-sized properties.

KNOW WHO'S COMING AND GOING

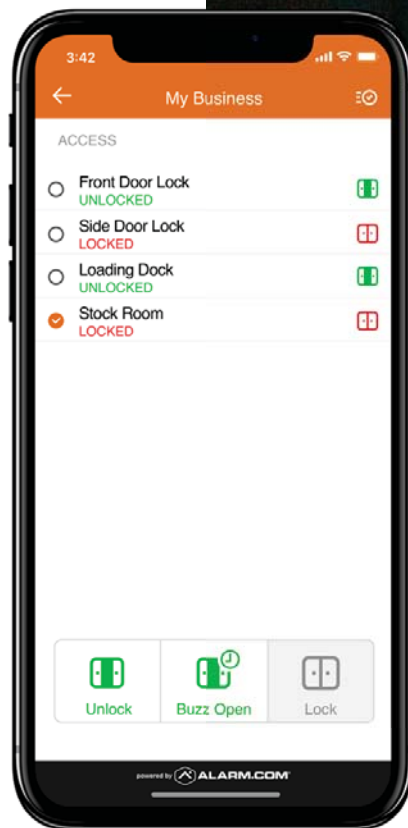

Integrated locks, controllers and card readers help you understand who's inside the business at any time.

CONNECTED LOCKS

Commercial-grade locks help keep offices and back rooms secure.

REMOTE CONTROL

Remotely lock and unlock doors for staff and deliveries.

Energy Management

CLIMATE CONTROL

Control your smart thermostats automatically, and on-the-go. Keep your business at an appropriate temperature and prevent employees from making costly changes.

REDUCE ENERGY COSTS

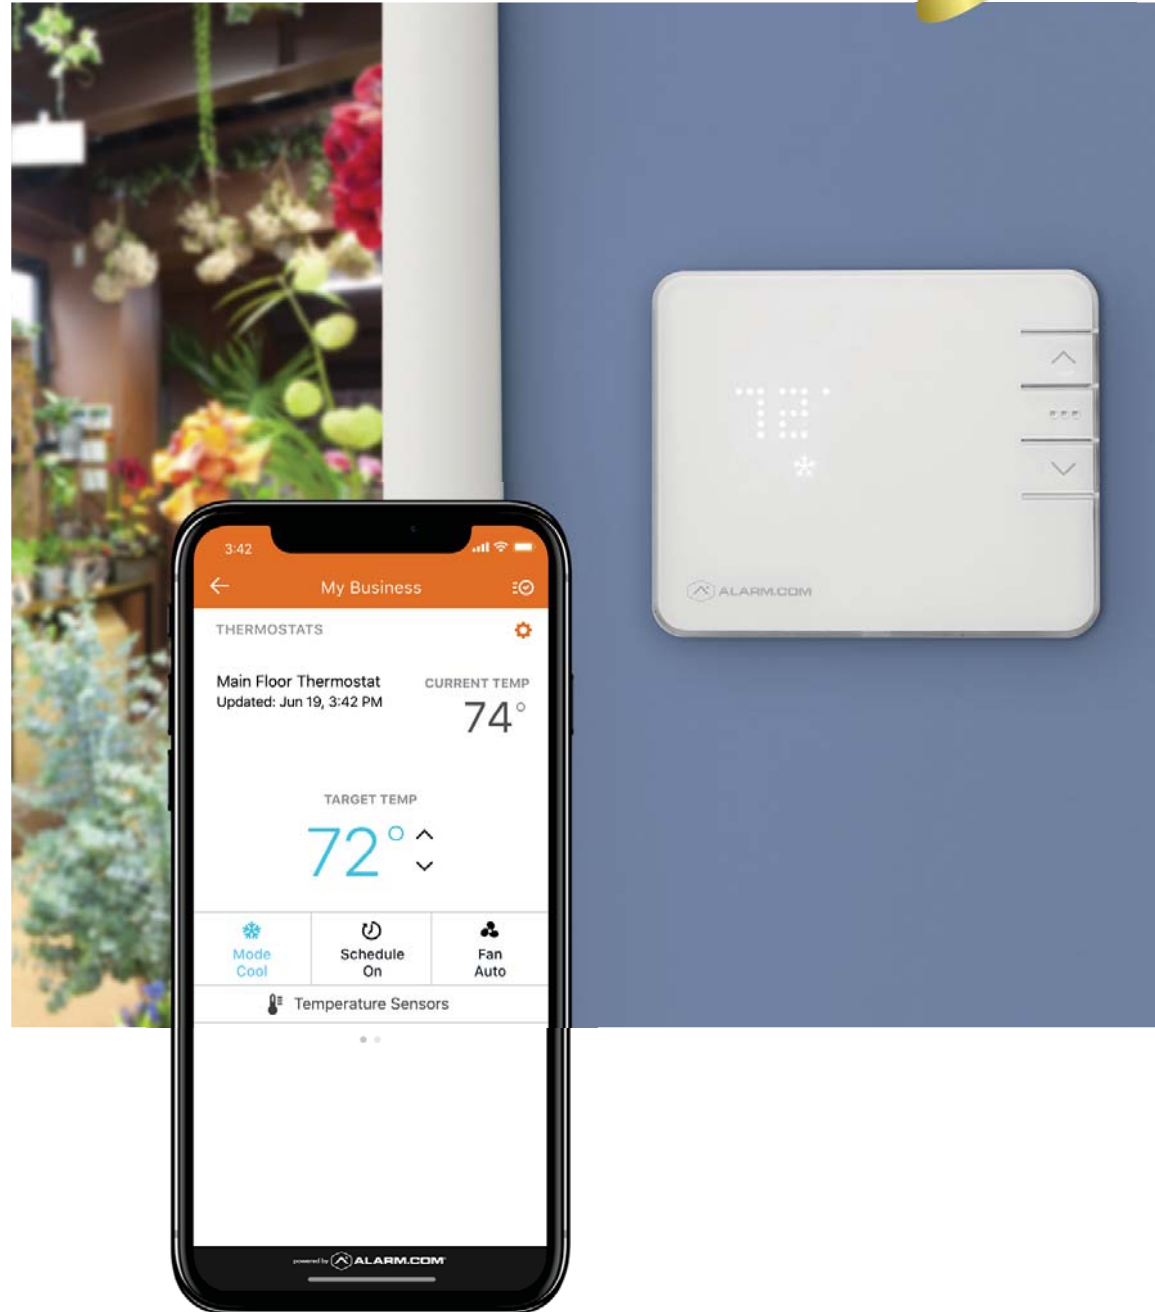

Use thermostat schedules to automatically save money during closed hours, while ensuring that it's comfortable by the time staff arrive again in the morning.

IMPROVED PROPERTY MANAGEMENT

Get notified when the thermostat setting is changed or the refrigerator door is left open.

SCHEDULED LIGHTING

Easily set up lighting schedules to keep your business safe and well lit, reducing liability risk.
