# Smarter Video Monitoring

powered by  **ALARM.COM**

See every important moment at your home, even when you're not there.

Enjoy anytime live streaming, smarter video alerts, and continuous HD recording with Alarm.com's best-in-class video solutions. Whether you'd like to speak to delivery personnel, deter intruders, or let in a loved one, Alarm.com gives you the power to remotely monitor your property from anywhere.

**WITH ALARM.COM VIDEO MONITORING, YOU CAN:**

- + Watch live or recorded video from anywhere
- + Auto-record when a door opens or alarm goes off
- + Get an alert when a person, animal, or vehicle enters your property
- + Turn on lights and/or sound an alarm to deter unwanted visitors\*
- + Stay protected with tamper-proof, secure cloud video storage

*\*Available on select cameras*

## See everywhere

Stay connected with video from indoors, outdoors, and the front door. Watch live feeds from your property right on your phone, tablet, computer, or smart TV.

## Know more with less

Spot what's important—even when there's a lot going on—with customizable video alerts. Specify which alerts you want and get more insight with less interruption.

### PERIMETER GUARD™ FOR PROACTIVE DEFENSE

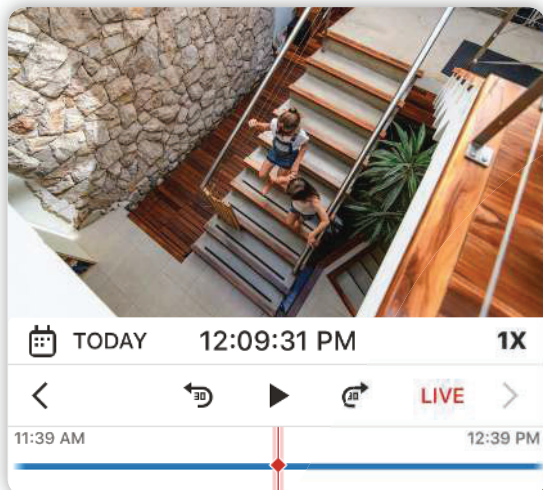

Stop unexpected visitors in their tracks with Perimeter Guard proactive defense\*. Alarm.com's advanced Video Analytics will sound an alert and flash a camera's LED to deter potential intruders.

## Talk, listen & connect

See and talk to your family, visitors, and delivery drivers through your mobile app. See visitors in full screen portrait mode and take action from the doorbell call screen.

## Never miss a thing

Get 24/7 HD recording with secure video streaming accessible from anywhere. With a searchable library, it's easy to find clips of notable events.

# A Window to Your World

Alarm.com Video is not only an added layer of protection for your family and your home, it will also keep you informed about important daily events that happen at your property when you're not there. Cameras can be integrated with an Alarm.com security system or used independently.

## Look what you can do

### Simple

Remotely control your cameras from any computer or smartphone

- Receive motion-activated clips of your kids arriving home from school, or visitors knocking at your door.
- View live or recorded video to stay aware of the activity at your property.

Watch live video from multiple cameras simultaneously

- See what's going on, both inside and outside your home, all on a single screen. You can also view your vacation home cameras from the same account.

### Flexible

Access and control your cameras with mobile apps for iPhone, BlackBerry and Android devices

- Change the views of your pan/tilt cameras from your smartphone while you're at work or on vacation.

Schedule motion-triggered recordings at times important to you

- Check in on kids and pets while away from home.

Get real-time email or text message video alerts

- Watch contractors or cleaning crews coming and going.
- Be notified in the event of a possible break-in.

Convenient privacy button option

- Disable video recordings when you and your family are at home.

### Powerful

View and protect recorded, searchable clips

- With secure offsite video storage no tampering can occur.

Link traditional security cameras with Alarm.com's Video platform

- Alarm.com's IP Video Server makes any existing analog camera compatible with Alarm.com Video.

Wireless IP cameras

- Fewer holes in your wall during installation.

Tightly integrated with an Alarm.com security system

- Receive video clips of what is happening when an alarm is triggered or someone has disarmed the security system.
